TEERAPONG PANBOONYUEN received the Ph.D. degree in Computer Engineering, with a specialization in Geoscience Artificial Intelligence, from Chulalongkorn University, Thailand, in 2020. He is currently a C2F High-Potential Postdoctoral Fellow with Chulalongkorn University under the C2F High-Potential Postdoctoral Program. He is also an Adjunct Professor at Khon Kaen University and the Founder and Head of AI at the Panboonyuen Artificial Intelligence Laboratory (PBYAIL). His doctoral research was supported by the 100th Anniversary Chulalongkorn University Fund for Doctoral Scholarship, and his postdoctoral research has been supported by the Ratchadapisek Somphot Fund. His research interests include representation learning, optimization theory, self-supervised learning, adversarial machine learning, and large language models, with applications in computer vision, geospatial intelligence, and human–AI interaction. He has received several prestigious honors, including the Global Young Scientists Summit (GYSS) Scholarship, presented by Her Royal Highness Princess Maha Chakri Sirindhorn, in recognition of his scientific contributions. He serves as an Editorial Board Member for Discover Artificial Intelligence (Springer) and as a reviewer for leading journals and conferences, including IEEE Transactions on Pattern Analysis and Machine Intelligence, IEEE Transactions on Artificial Intelligence, IEEE Transactions on Image Processing, IEEE Transactions on Medical Imaging, IEEE Transactions on Geoscience and Remote Sensing, Pattern Recognition, Neurocomputing, Neural Networks, Computer Vision and Image Understanding, Scientific Reports, and ACM Transactions on Knowledge Discovery from Data. More information about his research and work can be found at https://kaopanboonyuen.github.io.
